PROJECTS

BookSwap Website

- Developed an e-commerce platform for book rentals, swaps, purchases, and sales. Integrated features for library collaborations and subscription-based access.

Rasta - TN State Bus Navigator

- Developed a web-based platform for state transport bus route management and travel assistance.
- Integrated APIs to connect a centralized database with an interactive frontend and map interface, enabling users to view exact bus routes and real-time bus tracking.
- Implemented features including live notifications, ticket booking service, and geolocation-based route visualization for enhanced travel convenience.

PicX - Photo Editing Web-App

- Developed PicX, a photo-sharing and editing platform using ReactJS (TypeScript) and Vite, containerized with Docker and deployed on **AWS EC2**.
- Built a fully automated CI/CD pipeline using CircleCI and implemented Infrastructure as Code (Terraform) with Ansible for seamless deployments.
- Integrated real-time monitoring with Prometheus and Grafana, ensuring scalability, reliability, and operational transparency.

In-house Project - MConnect – An AI-Enabled Mentor Connection Platform

- Developed MConnect, an AI-integrated platform designed to streamline mentor-mentee communication.
- Utilized ReactJS (TypeScript) for the front-end, Node.js/Express for back-end services, and MySQL for structured data storage.
- Implemented Gemini API with custom prompt engineering to function as an expert mentor, enabling NLP-based chatbot functionality for fast and accurate academic support.
